100Mbps Layer 3 Aggregation Switch

Overview

Featuring flexible combinations of 10G SFP+ and 10GBase-T downlink ports + 4×10/25G SFP28 uplinks, this switch delivers flexible, high-performance connectivity. The 100M-10G auto-sensing ports optimize speed while 25G-capable uplinks handle heavy traffic. PLANET MGSW-28240F L3 24-Port 100/1000BASE-X SFP + 4-Port 10G SFP+ Metro Ethernet Switch is specially designed for service providers and enterprises to deliver high-speed networking over longer distances. Its SFP+ and SFP fiber optic ports can be connected to various fiber and Ethernet cables to. Stack up to 9 switches with 200 Gbps bandwidth and unified IP for simplified control, fast failover and solid redundancy Enables Layer 3 routing between different parts of your network, improving efficiency by directing traffic to its optimal destination Featuring flexible combinations of 10G SFP+. 1. 8 Tbps high-density 100G/25G Layer 3 Etherlighting™ aggregation switch with MC-LAG support for high availability system design. Requires a 4-post rack, or a center-mount bracket or cantilever shelf on 2-post racks for optimal support. Layer 3 automatic failover (VRRP) and OSPF support is. The three layers of a traditional three-layer network design are the core layer, aggregation layer, and access layer. As the physical part of the aggregation layer, aggregation switches typically play a. The series provides enterprise-class Layer 2 and 3 switching, is designed for DNA Center and SD-Access management and automation, and includes an Enhanced Limited Lifetime Warranty (E-LLW). We offer toughened industry-specific products with multiple industry certifications, such as parts of the EN 50155 standard for rail applications.
