Congo Active Optical Device 1G

Overview

High-performance AOC solutions from 1G to 800G for data centers & enterprise networks. 100% compatible with major brands.

Key Takeaways

The Congo Solution Active Optical Device 1G refers to a 1-gigabit SFP transceiver used for optical or copper network connections, supporting high-speed data transmission and monitoring features.

Overview

The device is a 1G SFP (Small Form-factor Pluggable) transceiver, designed to connect network equipment such as switches, routers, or industrial controllers to fiber optic or copper cabling. Its primary function is signal conversion, transforming electrical signals from network devices into optical signals for fiber transmission, or vice versa for copper links, enabling reliable data transfer at 1 gigabit per second rates. Types and ApplicationsFiber-based 1G SFPsExample: SO-SFP-1G-O-Cxx-E from SmartopticsSupports OSC (Optical Supervisory Channel) and OTDR (Optical Time Domain Reflectometer) applicationsOperates at 100 Mbps and 1 Gbps Ethernet rates over distances up to 80 kmFeatures automatic switching to OTDR mode upon link disruption to measure optical return loss and signal qualityAvailable in multiple CWDM wavelengths and 1625 nm for compatibility with Smartoptics Open Line System products Copper-based 1G SFPsExample: 1000BASE-T SFP from OptoMediaSupports 1 Gbps over copper cabling up to 100 metersIncludes Digital Diagnostics Monitoring (DDM) for real-time monitoring of temperature, voltage, and link statusCompliant with SFP Multi-Source Agreement (MSA) and RoHS standardsSuitable for industrial, enterprise, and telecommunication applications Key FeaturesHot-swappable design: Can be installed or replaced without powering down network equipment, minimizing downtime Versatile compatibility: Standardized SFP form factor allows use across different hardware platformsMonitoring and diagnostics: Some models include OTDR functionality or DDM for proactive network maintenanceLong-distance support: Fiber SFPs can reach tens of kilometers, while copper SFPs are optimized for shorter distancesUse CasesData centers and campus networks: High-speed, low-latency connectionsMetropolitan area networks (MANs): Long-distance fiber links with monitoring capabilitiesIndustrial and enterprise networks: Reliable 1G connectivity with real-time diagnostics In summary, the Congo Solution Active Optical Device 1G is a versatile 1G SFP transceiver, available in both fiber and copper variants, designed for high-speed Ethernet connectivity, network monitoring, and flexible deployment in various networking environments.

Multi-Source Agreement (MSA) and SFF-8472. It ofer a simple and convenient way to interface PCBs to single mode fiber optic cables in Dense Wavelength Division Multiplexing (DWDM) applications. It is

Arista Optics Modules and Cables

All interface speeds, from 1G to 400GE have connectivity options that include Direct Attach copper Cables (DACs), Active Optical Cables (AOCs), multi-mode fiber and single-mode fiber transceivers.

Congo purchases 1G optical receivers in bulk

Enhance your Fiber Optic Equipment setup with our premium 1g Optical Receiver.Acquiring Fiber Optic Equipment in bulk through wholesale offers cost advantages, bulk pricing, and customization options.

Data Center Transceivers & Cables

Arista offers a broad portfolio of high performance optical transceivers and copper cables for datacenter and campus networks, with speeds ranging from 1G to 800G, and reach from 1m to 80km+.

Congo Active Optical Cable Market (2025-2031) | Trends & Revenue

6Wresearch actively monitors the Congo Active Optical Cable Market and publishes its comprehensive annual report, highlighting emerging trends, growth drivers, revenue analysis, and forecast outlook.

Congo Active Optical Cables Market | Share & Challenges 2032

In 2023, Congo active optical cables import market continued to see a high level of concentration, with top exporters being China, France, United Kingdom, Israel, and Netherlands. Despite a concerning

Pluggable Optical Modules: Transceivers for the Cisco

Supports Gigabit Ethernet, 1G Fibre Channel, 2G Fibre Channel, and OC-48, pending board rate support. Only P/N version 02 is qualified on the Cisco

Hilink Optics QSFP QSFPDD OSFP 10G SFP transceiver, Optical

If you have any questions about Hilink Optics CWDM DWDM QSFP QSFPDD OSFP 10G SFP transceivers,we will give the professional solutions to you.
