Fiber optic cable connection network card

Overview

PCI/ PCI-E Network Adapter Card is also called PCI Network Adapter, PCI Network Card, or NIC for short. It acts as the interface between a computer and a optical fiber network cable. The purpose of the optical fiber network card is to prepare, send, and control data on the. Fiber NICs come with pluggable cages that accept optical transceivers or direct-attach cables. Fiber NICs can accept a variety of media. Small Form-factor Pluggable, or SFP, is a hot-swappable optical communication transceiver. The primary use of SFP network cards is their ability to provide different interface types, allowing connections over various distances and across different media types. Find compatible options for Windows Server and Linux systems.
