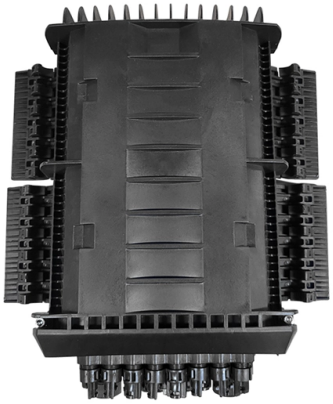
Frp single-core drop optical cable



Overview

Special low-bend-sensitivity fiber provides high bandwidth and excellent communication transmission property. Two parallel FRP strength members ensure good performance of crush resistance to protect the fiber. Novel flute design, easily strip. The 1-2 Core Aerial Self-Support FTTH Drop Cable (GJYXFCH) is a high-quality FTTH (Fiber to the Home) solution designed for reliable and efficient aerial fiber optic installations. For the Fiber Patch Cables, there are two major application areas which are computer work station to outlet and fiber optic patch panels or optical. The fibers, 250μm, are positioned in a loose tube made of a high modulus plastic. A Fiber Reinforced Plastic (FRP)/Steel wire locates in the center of core as a non-metallic strength member.
