# Anda Large Span Cable Tray

2. Imported design is convenient for expansion.

The design of two inlets saves space and allows for rear line entry.

## Overview

Our cable trays and cable lad-ders from the wide span system ensure that cables can be routed easily over long distances. Wide-span cable ladders and trays guide control and power cables in industrial halls, production facilities and power plants or in plant and tunnel construction to exactly where they are needed – flexibly, reliably and absolutely safely. And even large distances can be spanned effortlessly with the. Different from normal cable trays, Large span cable tray has large supporting span with high loading capacities. Large span cable trays can be divided into ladder style, channel style, perforated style with galvanized, powder coated. Cable tray (or cable ladder) systems are a popular alternative to electrical conduit systems, as they have an outstanding record for dependable service, design flexibility and cost savings in commercial and industrial applications. Specifically, this structure provides the absolute maximum heat dissipation available in any routing system.
