Optical power measurement module

Overview

These modules include multiport optical power meters, optical power sensor modules, optical heads and return loss modules. Through the platform based test solution we can provide. Thorlabs' expanding line of optical power and energy meters includes a large selection of sensor heads, single- and dual-channel power and energy meter consoles, power and energy meter interfaces, a wireless power meter with a built-in photodiode sensor, and a fiber optic power meter designed for. The high-performance optical power meter module for Space-saving design. [Measurement items] I-L measurement, DC extinction ratio, PD current, Modulator current Optical. The PowerMeasuringModule (PMM) is a robust laser power measurement system that determines optical power directly in the production zone. Due to the fieldbus interface, the PMM can be easily integrated into equipment controllers – various systems are available. The output is a voltage linearly proportional to the input power. A graphical user interface is delivered.
