The network patch panel seems redundant

Overview

The short answer: reorganize the patch panel when the hardware is still appropriate and the main issue is cable discipline, labeling, or patch cord management. Question: Assuming that I want to connect 2 switches hosted in 2 different room in a datacenter. Each switch is installed in separate rack and connection between racks is with cables. Installing a fiber optic patch panel may seem straightforward, but many network issues originate from small installation mistakes. Poor fiber routing, incorrect bend radius, or improper labeling can all lead to signal loss, maintenance difficulties, and unexpected downtime. 6 billion by 2030, with patch panels playing a pivotal role. This message was posted by a user wishing to remain anonymous Dear Community,I'm new in the networking. By ITU Online CompTIA Team IT training provider since 2012, specializing in CompTIA, Cybersecurity, Project Management, Cisco.
