Distribution Box Distribution Unit

Overview

A distribution box, also known as a distribution board or panel, is the central unit that distributes incoming electrical power to various circuits. In the field of power distribution, we offer three high-quality solutions for professional use. Although less common in modern installations, fuse. A distribution board (also known as panelboard, circuit breaker panel, breaker panel, circuit breaker, electric panel, fuse box or DB box) is a component of an electricity supply system that divides an electrical power feed into subsidiary circuits while providing a protective fuse or circuit. A power distribution box is a key part of any electrical system—it's the place where electricity from a main source gets divided and sent out to different circuits. It houses protective devices such as circuit breakers or fuses, ensuring both equipment protection and user safety.
