Middle-shell optical power meter type B

Overview

The mOPM-C2B offers flexible port configurations with options for 8, 16, and 24 ports, and can support up to 192 ports in a 3U 8-slot mainframe. It operates across a wide wavelength range of 1260 to 1640 nm and measures optical power from +10 to -70 dBm with a high resolution of. Thorlabs' expanding line of optical power and energy meters includes a large selection of sensor heads, single- and dual-channel power and energy meter consoles, power and energy meter interfaces, a wireless power meter with a built-in photodiode sensor, and a fiber optic power meter designed for. The VIAVI mOPM-C2B represents the latest innovation in modular Optical Power Meters, designed to meet the growing need for high channel count testing for modern optical components, modules and systems. Engineered for precision and versatility, the mOPM-C2B excels in applications such as co-package. TM70B PON Fiber Optic Power Meter offers precise measurements at 1310, 1490, and 1550nm. Ideal for telecom and network testing. Shop now for reliability!| Alibaba. They may be used in conjunction with the Senter ST815C Laser Source to offer precise measurement at 850, 1300, 1310, 1490, 1550 and. The OMM-6810B is an accurate, low noise power meter capable of measuring optical power over an 80dB dynamic range and offers the stability and repeatability necessary for precise power measure-ment. Featuring an InGaAs diode detector, it ensures accurate readings across 850nm, 1300nm, 1310nm, 1490nm, 1550nm, 1625nm, and 1650nm wavelengths.
