Durable Trough Cable Tray

Overview

Trough Tray provides overhead protection and concealment for a wide variety of wire cabling installations. Aluminum construction offers high loading capacities in a lightweight, easy to install design. A full line of accessories, covers, and radius fittings are available. Cable tray systems are engineered support structures designed to route, support, and protect insulated electrical cables used for power distribution, control, instrumentation, and communication. Unlike conduit systems, cable trays allow cables to be laid in bundles, improving accessibility, heat. Cablofil steel trough trays provide the strength and security required when then need to limit cable access is of primary importance. Cablofil steel trough trays. Legrand continues to be an innovator in cable management solutions and is proud to introduce Cablofil Trough Tray, a cable management system designed to maximize network reliability and minimize lifecyle costs. Installing and integrating seamlessly with STAKKAbox™ vault systems and MULTIduct™ cable protection systems.
