High Voltage Fireproof Cable Tray Quotation

Overview

Invicta Durasteel have installed cable enclosures across a variety of projects, including the protection of critical life-safety cables.

Key Takeaways

Fireproof cable trays for high-voltage applications are available in various materials and designs, with suppliers offering customization, compliance with international standards, and global shipping. Product Types and MaterialsHigh-voltage fireproof cable trays come in several designs to meet load, ventilation, and fire safety requirements: Ladder-type trays: Provide strong horizontal support and excellent airflow, ideal for heavy power cables in industrial and commercial settings. Perforated trays: Combine solid base strength with cutouts for ventilation and reduced weight.

Wire mesh (cable basket) trays: Lightweight, flexible, and suitable for dynamic environments. Solid or trough trays: Offer maximum protection for sensitive cables. Materials include galvanized steel, hot-dipped zinc, stainless steel, aluminum, and FRP (glass fiber reinforced plastic), with options for halogen-free or fire-resistant coatings to reduce fire load and enhance safety.

Compliance and Safety

Fireproof cable trays are designed to maintain circuit integrity during fire exposure, minimizing fire spread and protecting life and equipment. They comply with standards such as NFPA 70, IEC 60332, BS 476, DIN EN 61537, and VDE/NEC regulations. For critical circuits like emergency lighting or fire alarms, pairing trays with fire-rated wraps, intumescent coatings, or mineral-insulated cables is recommended.

Customization and Supplier Services

Suppliers like TONGZHOU MACHINERY offer: Custom shapes and sizes for high-voltage applicationsPre-production samples and final inspection before shipmentOEM/ODM servicesDelivery within 15–30 days after advance paymentExport to multiple countries including the US, Europe, and Asia Other suppliers, such as ECER Mart and Alibaba vendors, provide stainless steel, galvanized, and high-humidity resistant fireproof trays with bolt connections and industrial-grade durability.

Quotation Process

To obtain a quotation: Specify tray type (ladder, perforated, wire mesh, solid)Select material (galvanized steel, stainless steel, aluminum, FRP)Provide dimensions and load requirementsIndicate quantity and delivery locationRequest compliance certificates if needed Most suppliers respond quickly to inquiries via their websites, and some provide sample trays for evaluation before bulk orders. Recommended SuppliersEkabel24: Offers high-quality cable trays and ladders compliant with DIN EN 61537 Alibaba: Multiple vendors with fire-resistant, high-strength steel trays and customization options ECER Mart: Fireproof galvanized and stainless steel trays for industrial applications TONGZHOU MACHINERY: Large-scale production, global shipping, and custom solutions for high-voltage power distribution For the most accurate quotation, contact the supplier directly with your project specifications, material preferences, and required standards compliance.

Fire Rated Cable Encasements: Invicta Durasteel

Invicta Durasteel have installed cable enclosures across a variety of projects, including the protection of critical life-safety cables. For more information, to book

FIRE RESISTANT PROOF CABLE TRAY, DIN STANDARD E90

Cablofil cable tray is the preferred choice for the cable containment of low and high voltage electric cables where fire resistance is crucial - this includes cable basket tray systems for Prysmian FP

Fire Resistant Cable Tray

Need a faster quote, a qualified alternative supplier or a long-term cable tray manufacturing partner? Send your inquiry now and let our team help you evaluate the right tray type, material, finish and

High Voltage Cable Protection: Invicta Durasteel

Interested in starting a high voltage cable fire protection project with Invicta? Get in touch today to speak to our experts, and arrange a complimentary site visit.

Cable trays Cable trays

Benefits of Professional Cable Tray Systems Modern cable trays deliver high load-bearing capacity, excellent corrosion resistance, and fast installation. They simplify cable routing, reduce fire load

Fire Stopping Cable Tray: Reliable & Customizable

Find top-rated fire stopping cable tray solutions with fire resistance, UL certification, and customization options. Click to explore trusted suppliers and secure your project today.

Fire Rated Cable Tray, Heavy-Duty Cable Tray Manufacturer

Enhance workplace safety, minimize downtime, and improve aesthetics with the well-designed Fire Rated Cable Tray from NewReach. Ask for a Quote!

Cable tray

ABB designs and manufactures cable tray systems, including perforated tray, cable ladder, channel tray and strut (metal framing).

Trunking and Cable Tray Protection

Trunking and cable trays are designed to house and protect electrical wiring, which can be vulnerable to damage from environmental factors, physical impact, or

Fire Resistant Cable Tray

HFJD Cable Tray manufactures high-performance Fire Resistant Cable Trays designed for critical power distribution, fire alarm systems, emergency lighting circuits, and industrial cable management

The Master Catalog of Okonite Cables

The Okonite Company maintains an in-stock inventory of many of the products. The Master Catalog contains 7 sections with different types of cable, ranging from Single Conductor Low Voltage Cables

KemSafe Cable Enclosure System

© 2026 PROMETHEAS OPTICAL - All rights reserved

Kemwell Kem Safe cable enclosure systems (CES) are specifically designed and manufactured to provide optimum fire protection and thermal insulation performance at high temperatures. Kem Safe

Fire Rated Cable Coatings and Penetration Sealing

Firestop Cable Coating is a white, water based synthetic resin which is applied by airless spray, or painted onto cables & cable trays to prevent the spread of fire. This product reduces the spread of

High-Voltage Cable Management Using Cable Trays

Then see how to handle high voltage cable in a safe manner by using the correct cable trays. This guide encompasses the material selection,

Cable Tray – KMC Engineering Company

CABLE TRAYS Cable Tray wiring systems are the more preferred wiring systems, than conduit wiring systems, owing it to their safety, dependability, space and cost.

Cable Trays

Perforated cable tray Consists of a ventilated bottom with side rails. It provides more support to cables than the ladder-type, but also have openings allowing efficient heat dissipation for high voltage cables.

Fire resistant cable tray | Hermi-solutions

Cable trays are intended for the construction of fire-resistant cable paths with surface cable laying. Cable paths are constructed as standard or lightweight

CABSYS Cable Tray | GRP Cable Tray | Cable

CABSYS cable tray manufactured by MITA powered by WIBE, is specified for rail cable containment throughout Network Rail and London Underground – GRP
