Optical module range 70km

Overview

It supports an aggregate bit rate of 103. 1Gb/s, offering an impressive 70km reach for G. Dual-fiber module, XFP CWDM 10GBASE-ER/EW, LC connector, operating wavelength 1550nm, distance up to 70km (23dB). The input signal level in this type of modules should not exceed -8dBm to prevent damage to the APD receiver. Modules support digital diagnostics technology, which allows real-time. The 10GxxCWDM-USFPx is a CWDM SFP+ optical transceiver with 1470nm to 1610nm wavelength support, designed for single-mode fiber (SMF) connections. It offers 10Gb/s data transmission over 70km, ideal for long-distance, high-speed networking in CWDM (Coarse Wavelength Division Multiplexing) systems. Optimized for single-mode fiber, this. GIGALIGHT's 10G SFP+ DWDM optical transceiver modules for metro telecom, 5G pre-transmission or LTE pre-transmission are compliant with 10G Ethernet transport protocols, with optional multi-rate versions compatible with 10G CPRI, 10GFC, SONET/SDH and OTN OTU2e.
