Security AI Server

Overview

This guide examines the 15 best solutions for securing AI agents in 2026, spanning enterprise MCP gateways and dedicated security platforms. Shadow AI refers to the unregulated use of AI technology within organizations, often without official oversight or security measures. The Model Context Protocol, released by Anthropic in late 2024, has gone mainstream. OpenAI, Google, Microsoft, and Block all back it. Every wired-in MCP server gives your AI agents access to databases, source.
