Single explosion-proof distribution box

Overview

Besides the present designation for the full plastic explosion-proof mobile power branch connection socket box, it also can be designed and manufactured according to requirements.

Key Takeaways

A single explosion-proof distribution box is a certified enclosure designed to safely distribute electrical energy in hazardous areas, typically made from stainless steel or GRP and compliant with ATEX and IECEx standards.

Key Features

Material and Construction: Explosion-proof distribution boxes are commonly made from stainless steel (AISI 304L or 316L) or glass-reinforced polyester (GRP), providing durability, corrosion resistance, and protection against extreme temperatures and harsh environments. Some models feature specialized hinge structures to protect flameproof joints and extend service life. Certifications: These boxes are certified for hazardous areas under ATEX, IECEx, UL, and DNV standards, ensuring safe operation in Zone 1, Zone 2, 21, and 22 environments.

Certification guarantees compliance with international safety standards for explosive atmospheres. Components and Customization: Single explosion-proof distribution boxes can include MCBs, isolation switches, circuit breakers, push buttons, voltmeters, ammeters, and LED indicators. Many manufacturers offer customizable internal layouts to accommodate specific client requirements, allowing for space-saving combinations and flexible installation.

Temperature and Environmental Resistance: These enclosures are designed to operate in extreme temperatures (as low as –40°C) and withstand outdoor climatic conditions, making them suitable for industrial, maritime, and chemical plant applications. Applications: Explosion-proof distribution boxes are used in chemical plants, oil and gas facilities, refineries, and other hazardous areas where flammable gases, vapors, or dust are present. They ensure safe energy distribution and control while preventing ignition sources.

Examples of ProductsHRMD92 Ex d II B+H2 Distribution Box: Made of 316 stainless steel, with a hinge structure to protect flameproof joints, customizable for various distribution systems. Hexlon Explosion Proof Distribution Boxes: IECEx and ATEX certified for Zone 1 and Zone 2, durable and suitable for industrial applications. Atex Delvalle Ex Distribution Boxes: Stainless steel enclosures with configurable control elements, push buttons, and indicators, designed for extreme conditions.

These boxes provide a reliable, safe, and flexible solution for electrical distribution in hazardous environments, combining robust construction, international certification, and customizable internal configurations.
