FMT optical cable

Overview

FMT light source cables are designed to deliver maximum light when coupled to a medical fiber optic light source. They are compatible with virtually all endoscopes, medical instruments, and microscopes. This approach provides two main advantages: first, it enables real-time monitoring of the fiber network's operational status. The Fiber Optic Modules are assembled in the FMT sub-rack series: 3 modules in 1U panels and 12 modules in 3U panels. MTP TAP modules are available as well for use in the FMT family productsSliding radius limiters provide ultimate fiber management by addressing one of the most critical elements of fiber cable management: bend radius protection. Prysmian has a rich history in American optical fiber, dating back to our legacy with companies such as Pirelli, FOS, Alcatel, Draka, and General Cable.
