Super Bridge Laying Machine

Overview

SLJ900/32, locally known as the Iron Monster, is a step forward in bridge construction that lifts, carries, and sets prefabricated and full-length track sections at the loaded speed of 3. 1 mph (5 km/h), leaving no place for the prolonged on-site assembling process. Launching the Belt and Road initiative in 2013, China has proven to be the heir to the tradition of the Silk Road. " This 580-ton engineering marvel builds high-speed railway bridges by carrying and placing massive concrete beams with incredible precision. At over 90 meters in length, the SLJ900/32 is also one of the world's longest terrestrial vehicles. □ from Equipment Supply to Engineering Services| Mechanical Engineer | Industrial Trader | Consultant | Specialist in Oil & Gas, Petrochemical, Water & Power Industries. □□ Meet the Beast: SLJ900/32 Bridge Girder Erection Mega Machine □□ When it comes to. The SLJ900/32, made by the Beijing Wowjoint Machinery Company, is a 580 ton, 300 foot long and 24 foot wide mega machine that looks more like a train than a crane and acts a lot like a Stretch Armstrong action figure.

China''s 640-Ton ''Iron Monster'' Can Erect Colossal

SLJ900/32, locally known as the Iron Monster, is a step forward in bridge construction that lifts, carries, and sets prefabricated and full-length track

SLJ900 Bridge Builder: The Massive Chinese Mega Machine That

Watch how this mega machine extends its legs and moves between piers to construct bridges faster and safer than traditional methods. A true masterpiece of modern infrastructure technology.

SLJ900/32

The SLJ900/32 or otherwise known as the Iron Monster is a superheavy launching gantry and one of the largest and most ubiquitous in the world. At over 90 meters in length, the SLJ900/32 is also one of the world''s longest terrestrial vehicles. It is built by the Beijing Wowjoint Machinery Company and designed by the Shijiazhuang Railway Design Institute.

Meet the SLJ900/32: A 580-ton Bridge Erection

This engineering marvel is not just a machine—it''s a 580-ton, 91-meter-long mobile factory on rails. It lifts, moves, and places bridge segments without the need for

SLJ900/32 Bridge Girder Erection Monster Machine

The SLJ900/32, made by the Beijing Wowjoint Machinery Company, is a 580 ton, 300 foot long and 24 foot wide mega machine that looks more like a train than a

Fascinating Look at How the 580-Ton "The Iron

Developed by the Beijing Wowjoint Machinery Company, this massive machine is capable of carrying, lifting / placing sections of track, and

A monster-sized bridge building machine in action

From Digital Trends: This bridge-building process may appear complicated, but it is in fact brilliantly simple. It begins when the machine picks up a new beam from

SLJ900/32 Transportation and Erection Integrated Machine-Railway ...

Zhuzhou Xuyang electrical and mechanical Technology Development Co., Ltd. was founded in 2002, and is a high-tech enterprise integrating research, development, manufacturing, sales and service.

Equipment Used in Bridge Construction: 10 Powerful

© 2026 PROMETHEAS OPTICAL - All rights reserved

These machines are key elements in the equipment used in bridge construction for material handling. Without such heavy lifting equipment, placing large

The Iron Monster: China''s Massive Bridge Building Robot

Many Chinese bridges are built with a massive robot called the SLJ900/32, also known as the Iron Monster. It can move big sections of pre-built

SLJ900/32 Bridge Girder Erection Monster Machine

A bridge needs to be built, so time to bust out the cranes, right? Not so fast, a Chinese company has built a machine that has a creative way of

Meet China''s Bridge Building Machine

Introducing the bridge building machine - China''s Bridge building Robot. Fabrication meets automation. Read more Enser News!

What happens when a cluster of GPUs can out-research a team of

The machine makes algorithmic improvements, the machine produces more powerful models, and the machine accelerates its own evolution. You transition instantly from linear human

Bridge girder erection Machine: SLJ900

The operational process is simplified and the bridge erecting machine can erect box girder at the tunnel entrance and erect box girder inside the tunnel.

SLJ90032 Bridge Girder Erection Mega Machine

Enjoy the videos and music you love, upload original content, and share it all with friends, family, and the world on .

Watch: the 580-ton monster machine contructing bridges in China

Created by Beijing Wowjoint Machinery Co, this colossal 580-ton machine is used to construct bridges in China, extending itself between pillars and placing beams along the way.

China''s Insane Bridge-building Machines Amaze the World.Full

Step inside the world of modern bridge construction—from China''s SLJ900 “bridge builder” placing box girders with millimetric precision, to full-span launching (FSLM) systems lifting ...

Check out China''s Monster Bridge-Building Machine

While Chinese bridges have made big headlines recently – and, later, made terrifying headlines – the technology used to construct China''s everyday
