## Overview

A yellow distribution box is an electrical control cabinet designed to distribute electrical power safely to multiple circuits. The yellow color enhances visibility, making it ideal for construction sites, industrial areas, and outdoor applications. These boxes can be used for temporary power distribution, foundation wiring, or industrial control applications.

## Components

Typical yellow distribution boxes may include: Switches and circuit breakers: For controlling and protecting individual circuits from overloads or short circuits. Automatic transfer switches: Some models, like those from Guangxi Chunmao Electrical, include automatic transfer switches for seamless power switching between sources. Outlets and sockets: To provide power access for tools, machinery, or temporary installations.

Wiring and busbars: Depending on the model, boxes may come pre-wired or require on-site wiring.
