What does finished optical module mean

Overview

At this point, the production process of the optical modules is complete. The finished products are placed into anti-static bags and blister packs, then packaged and shipped via courier to customers around the world. When the transmitter is connected to the receiver through the optical fiber, if the bit error rate of the whole system does not achieve the desired effect, is it the transmitter's problem or the receiver's problem?

A finished optical. Once the housing is installed, it becomes a semi-finished optical module. And when you copy these formulas, these cell references can adjust automatically (or should I say automatically). Below is an example where I copy the cell C2 (which has a.
